**Spring, 1915**

# CATALOG OF Boxford Nursery

## **KELSEY'S** **Hardy American Plants,** **Rhododendrons, Azaleas** **and Specimen Evergreens**

THIS IS A PRICED CATALOG of my Boxford Nursery, located at Boxford, Massachusetts (East Boxford P. O.), on the Georgetown branch of the B. & M. R. R. Here may be seen growing the choicest collection of specimen nursery stock, selected for the most discriminating buyers. Special attention is given to hardy native plants, which must always be the basis of successful permanent plantings.

**SPECIMEN STOCK.** There is a growing demand for specimen stock in Conifers, Rhododendrons, Kalmias, Andromedas and other evergreens, and Boxford Nursery is established to supply this need.

Landscape architects, park and cemetery superintendents, and the owners of large estates will find it of great advantage to visit Boxford Nursery and personally select material in the nursery row.

**PRICES** are made to fit the quality of stock sent out. Few realize that the real value of nursery stock is largely underground. Frequent transplanting, and handling specimens with adequate, burlaped balls, means success and quick results. It costs more, but it is the fixed policy of the Boxford Nursery; and "cheap" stock will not be handled or sent out. The best is always the cheapest.

**PACKING CHARGES FREE** at prices in this catalog for shipment by freight or express. Team and auto delivery to North Shore or Boston points at net cost.

**VISITORS ARE ALWAYS WELCOME.** Boxford Nursery is easily reached by train or automobile, and Mr. Kelsey will be glad to meet prospective customers at the nursery by appointment.

A visit to Boxford Nursery during the blooming season of Rhododendrons and Azaleas is especially worth while.

**HARLAN P. KELSEY, Owner**

Office, 287 Essex St.  
Telephone Connection

**SALEM, MASS.**

# CATALOG OF BOXFORD NURSERY

Note: All plants are transplanted and nursery-grown unless plainly marked otherwise.

The larger sizes are always shipped with balls and are burlaped, which means they will *grow*. Prices include all charges, packed free on board cars, Boxford, Mass., freight station.

4 to 5 ft.....	6 00	50 00
6 to 8 ft.....	9 00	80 00
Larger specimens.....	\$12 to 40 00	

*The true Fraser's Fir (Abies fraseri)*

Superior in every way to the *Abies balsamea*, or Common Balsam Fir. We have thousands of fine plants to draw from.

**Abies fraseri.** Fraser's Fir. The northern species, *Abies balsamea*; is almost worthless in any but the latitude of middle and northern Maine, as it becomes "leggy," thin, and is short-lived. Fraser's Fir, however, a distinct species from the highest peaks of the Carolina mountains, makes a perfect specimen lawn and screen tree, with dark green, thick-set foliage (blue underneath) and compact, pyramidal habit. It is one of the choicest of all American conifers of the Fir section.

*Abies fraseri* is destined to become one of the most popular and widely planted of Firs, and to meet this demand we have them by thousands in all sizes.

	Each	10	100
2-yr. seedlings.....	\$30 per 1,000..	\$0 40	\$3 50

# KELSEY'S HARDY SPECIMEN EVERGREENS

## Catalog of BOXFORD NURSERY

*Kalmia latifolia* (See page 4)

### EVERGREEN TREES AND SHRUBS, continued

**Andromeda (Pieris) floribunda.** 2 to 4 feet. One of the finest of all broad-leaved American shrubs. Compact growth, with shining evergreen leaves and abundant racemes of showy white flowers in May. The next season's buds appear after the flowering season and give the plant the appearance of being in bloom the year round. My stock is all strictly American-grown and of finest quality. The imported Andromeda is very often difficult to establish. All plants are heavily budded.

	Each	10	100
9 to 12 in., clumps.....	\$1 00	\$8 00	\$70 00
1 to 1 1/2 ft., clumps.....	1 50	12 50	100 00
1 to 1 1/2 ft., heavier clumps.....	2 00	17 50	150 00
<b>japonica.</b> Japanese Fetter Bush. This fine species is of more upright growth than floribunda, the young foliage presenting striking shades of reddish pink early in the season. The flowers are in terminal racemes, and very showy.			
1 to 1 1/2 ft.....	\$1 50	\$10 00	
<b>Arctostaphylos uva-ursi.</b> In pots, strong.....	60	5 00	\$40 00
<b>Buxus arborescens.</b> Tree Box. 3 to 9 in.....	20	1 50

<b>communis aurea.</b> Golden Common Juniper. 1 1/2 to 2 ft.....	1 00	8 50	

### **Juniperus communis depressa.**

Prostrate Juniper. 6 to 12 in. diameter ....	50	4 00	30 00
1 to 1 1/2 ft. diameter.....	75	0 00	50 00
1 1/2 to 2 ft. diameter.....	1 25	10 00	90 00
2 to 3 ft. diameter.....	1 75	15 00	130 00
3 to 4 ft. diameter.....	2 50	20 00	
Larger specimens, up to.....	15 00		

Without doubt this is the best prostrate form of Juniper for ground-cover. It is at home on sandy or gravelly hillsides, fully exposed to the sun, where single plants often reach a diameter of 15 feet or more.

In shade it does well where other shrubs or grass will not thrive, forming a looser covering, however, than in the open. It varies in form from the completely prostrate type to the ascending type. 2 to 4 feet high.

We have several thousand transplanted specimens to select from, up to 8 feet in diameter.

	Each	10	100
<b>japonica.</b> Japanese Juniper. 1 1/2 to 2 feet....	\$1 00

7 to 8 ft.....	6 00	50 00

Larger specimens up to 20 ft. at special prices.

BOXFORD NURSERY makes a specialty of the Red Cedar. It is, we believe, the finest of all evergreens for formal plantings for New England conditions, giving an effect somewhat like the Italian cypress.

As a background for rhododendrons, shrubbery and flowers, it is unequalled, except perhaps by the Carolina hemlock. It does not take the place of other evergreens, but holds a unique place for certain effects, and no other evergreen can take its place. Individuals vary in color from light and dark green to steel-blue.

We offer hundreds of transplanted specimens up to 20 feet in height. We also collect specimens with large balls in ear-lots or less at prices according to selection, ordinarily 75 cents a foot in height.

***Kalmia latifolia*.** The Mountain Laurel. One of the grandest of our native broad-leaved evergreen shrubs, attaining tree-like proportions in our southern mountains. In cultivation it is a broad, thick shrub, and, when in full bloom, of surpassing beauty. The wheel-shaped flowers in close terminal corymbs, pure white to pink, appear in May or June in such profusion as almost to smother the foliage. Its thick, shining leaves, conspicuous the year round, make it a shrub of greatest value for massing. The hardiness of *Kalmia latifolia* is beyond doubt, it being found sparingly in Nova Scotia and increasingly in abundance through New England and the middle Atlantic states (particularly in the higher altitudes), till the crest of the southern Alleghanies is reached.

This is another of my specialties and my stock is unequalled elsewhere.

<i>Ledum groenlandicum</i> . Labrador Tea. 6 to 9 in.		35	3 00	
<i>Leucothoe catesbaei</i> . Grows 3 to 8 feet. Few shrub-evergreens of the broad-leaved sort have the grace of this one. The thick, shining green leaves are evenly disposed on long, recurved branches, with dense racemes of beautiful, white, bell-shaped flowers. As an under-shrub or for banks and the borders of rhododendron masses or along streams it is without a rival. The sprays make beautiful winter decorations indoors, turning a rich bronze in the fall where exposed to the sun.

### RHODODENDRONS

<i>Rhododendron arbutifolium</i> (wilsoni).	Each	10
9 to 12 in.....	\$1 00	\$8 50
1 to 1½ ft.....	2 00	18 00

### RHODODENDRON CAROLINIANUM

#### A New American Species

#### Clear Pink. Absolutely Hardy

The smallest Alleghenian species; though wild, it attains a height of 15 feet and is wide-spreading. Leaves dark green, usually blunt and narrow, covered with rusty dots below, much smaller than either maximum or catawbiense. Flower-clusters appear in greatest profusion in June, covering the plant with a rose-colored mantle. Fine for rocky slopes or hill-sides, standing exposure unusually well, and invaluable as a single specimen or for massing with the other species.

	Each	10	100
9 to 12 in.....	\$0 75	\$6 00	\$50 00
1 to 1½ ft.....	1 00	8 00	70 00

4 to 5 ft., clumps.....	15 00		

### RHODODENDRON CATAWBIENSE

#### Of the Carolina Mountains

#### The Hardest of all Rhododendrons

It was this magnificent Rhododendron that over a hundred years ago was introduced into Europe, supplying, together with *Rhododendron maximum* and *R. punctatum*, color and hardy blood to the cultivated "hybrids," but with a consequent loss of hardiness; and so today, for American gardens, where ironclad hardiness is essential, we must turn to the true original species, found on the loftiest, coldest peaks of the southern Alleghenies, where it attains a height of 20 to 30 feet.

Considering the extreme hardiness, color of flower, compact growth and remarkable texture of foliage, which is a deep, shining green, and far superior to the better-known *Rhododendron maximum*, we can recommend the true native catawbiense as the finest for general use, withstanding exposure and extremes of temperature where other Rhododendrons fail.

Do not confuse this true species, which is absolutely hardy, with the common so-called catawbiense hybrid seedling so freely imported from Europe, which is at best half-hardy, and even when branched above is a single stem, showing bareness underneath for years.

Unlike *Rhododendron maximum*, it is a very free bloomer, with foliage of a dark, rich, lasting green, which never rusts. The trusses are a bright red-purple (in marked contrast to the muddy purple of the semi-hardy, half-breed, imported variety noted above), and as sent out by Highlands Nursery is always on its own roots.

For massing to produce a broad-leaved evergreen landscape effect, there is no plant equal to it in the latitude of the northern United States and Canada, where strictly hardy plants must be employed. As a rich, finished border to plantations of the commoner *Rhododendron maximum*, the value of *Rhododendron catawbiense* cannot be overestimated.

Do not compare our many-stemmed clumps with the single-stemmed, "bushy," half-hardy Rhododendrons offered by importers. There is no comparison.

	Each	10	100

### RHODODENDRON MAXIMUM

#### The Great American Rosebay

*Perfectly Hardy in the Latitude of Quebec*

*Rhododendron maximum* is, without doubt, the noblest of American broad-leaved shrubs. It is found growing sparingly in New England and New York, more abundantly in the Pennsylvania mountains, but reaching perfection only in the southern Alleghany Mountains, where it grows in such luxuriance as to form a striking feature in the mountain landscape. Its large, waxy white or delicately pink flowers appear in large trusses in July, the latest of all the *Rhododendrons*, greatly enhancing its ornamental value as a broad-leaved evergreen for finished landscape effect.

Not even in Asia do *Rhododendrons* grow more luxuriantly than in our southern Alleghany Mountains, where they attain a height of 30 feet or more. They must be seen in their native lavishness of growth and bloom, on the mountain-sides or hanging over the dashing ice-cold streams and waterfalls, to be properly appreciated, and a trip to the high Carolina mountains in spring and early summer is a never-to-be-forgotten series of joys to the lover of nature.

5 to 6 ft.....	5 00	45 00	400 00
7 to 8 ft.....	8 00	75 00	

***Tsuga caroliniana*.** Carolina Hemlock. Grows 40 to 80 feet. This grand new Hemlock, introduced by me, possesses a distinct pyramidal growth. Its dense, dark foliage and graceful habit are approached only by the finer Japanese Hemlocks. Some fine specimens are to be seen in the Arnold Arboretum, and are the first plants of this Hemlock ever sent out, being supplied by me to Prof. C. S. Sargent, in 1884.

## HARDY AZALEAS

The finest Azaleas in the world for permanent planting under American conditions are native species, including *A. arborescens*, *A. vaseyi*, *A. lutea* (calendulacea), the great flame-colored Azalea, and *A. nudiflora*, *A. viscosa* and *A. canescens*.

I have a stock of thousands of the finest plants in all sizes that will give immediate effect, and prices will be sent on request. It should be remembered that Azaleas play a very important part in the making of a permanent Rhododendron-bed, but care must be used to avoid clashing of colors. I shall be glad to make up proper combinations for my customers.

### LILACS ON THEIR OWN ROOTS

Fine collection of some of the best and newest hybrids in specimen stock. It is only recently that Lilacs on their own Roots were obtainable.

Ordinary stock is grafted on Privet, which "suckers" badly, often crowding out and killing the grafted top and leaving a Privet instead of a Lilac. The Lilac is the queen of spring-flowering shrubs, and the new hybrids mark an epoch in horticulture. For a tall hedge or screen there is nothing better than the Lilac, and for this purpose the old-fashioned white and purple sorts make a charming combination.

	10	100

# KELSEY'S Hardy American Plants Rhododendrons and Azaleas

## Catalog of BOXFORD NURSERY

### HARDY HERBACEOUS PERENNIALS, continued

	Each	10	100
<i>Cimicifuga americana</i> .....	\$0 20	\$1 50	\$12 00
<i>racemosa</i> . Black Snakeroot.....	20	1 50	12 00
<i>Convallaria majalis</i> . Lily-of-the-Valley.....	15	1 00	8 00
<i>Coreopsis verticillata</i> .....	15	1 00	8 00
<i>Cornus canadensis</i> . "Collected" clumps.....	20	1 25	10 00
<i>Cypripedium acaule</i> . Mohegan Flower.....	15	1 25	10 00
<i>reginae</i> . Showy Lady's Slipper.....			
1 to 2 crowns.....	30	2 50	20 00
3 to 4 crowns.....	75	6 00	50 00
5 to 6 crowns.....	1 25	10 00	80 00
7 to 8 crowns.....	1 75	15 00	
<i>Dicentra spectabilis</i> .....	20	1 50	12 00
<i>Dodecatheon</i> . Shooting Star; American Cowslip. Among the most charming early wild flowers. The species offered are easily grown in borders where they are subject to drought after blooming.			
<i>clevelandi</i> . Tall-growing form, with pure white or delicate pink flowers.....	10	\$1 00	\$4 00
<i>hendersoni</i> . Another of the best species with red flowers.....	1 00	4 00	
<i>patulum</i> . White, pale cream-color or rarely pinkish.....	1 00	4 00	
<i>radicatum</i> . Flowers deep rose-color.....	1 50	8 00	
<i>Drosera rotundifolia</i> .....	1 00	8 00	
<i>Erythronium</i> (Dog's Tooth Violet). These small, hulchous plants are extremely handsome in foliage and flowers, but to get best results should be massed in cool, moist woodlands or borders or along streams. Among the earliest spring flowers and, with their mottled leaves, make a fine, early ground-cover in shady locations.			
<i>albidum</i> . Leaves not mottled. Flowers white, yellow at base.....	Each 10	100	1,000
<i>americanum</i> . Bright yellow. Leaves mottled white. Common throughout eastern states.....	50	2 00	\$16 00
<i>californicum</i> . Cream-colored; often 4 to 5 on a stem, mottled leaves....	50	2 00	16 00
<i>citrinum</i> . Light yellow, orange at center, tips becoming pink.....	1 00	4 00	35 00
<i>giganteum</i> .....	1 00	4 00	35 00
<i>grandiflorum</i> . Bright yellow, with unmottled leaves.....	1 00	4 00	35 00
<i>hartwegi</i> . Yellow, each flower on a separate stalk.....	50	2 50	16 00
<i>hendersoni</i> . Flowers light purple with dark centers.....	1 00	4 00	35 00
<i>purpureum</i> . Small, spreading flowers crowded in a raceme; light yellow, becoming purplish. Smallest species.	1 00	4 00	35 00
<i>revolutum</i> . Pink, becoming purple...	1 00	4 00	35 00
<i>Eulalia gracillima</i> .....	\$0 25	2 00	15 00
<i>Eupatorium ageratoides</i> . White Snakeroot.....	15	1 25	10 00
<i>purpureum</i> . Trumpet Weed.....	20	1 75	15 00
<i>Festuca glauca</i> .....	20	1 50	12 00
<i>Galax aphylla</i> . Galax, or Coltsfoot....	35	2 25	18 00
<i>Habenaria ciliaris</i> . Yellow Orchis.....	15	1 00	8 00
<i>Helenium autumnale</i> .....	15	1 00	8 00
<i>Helonias bullata</i> . Swamp Pink.....	20	1 25	10 00
<i>Hemerocallis</i> . Gold Dust.....	20	1 50	
<i>middendorffiana</i> .....	20	1 50	
<i>Orangeman</i> .....	20	1 50	
<i>sieboldi</i> .....	20	1 50	12 00
<i>thunbergi</i> .....	20	1 50	
<i>Heuchera americana</i> .....	15	1 00	8 00
<i>sanguinea</i> . Coral Bells.....	20	1 25	10 00
<i>Heracleum japonicum</i> .....	75	6 00	
<i>Hibiscus</i> . Mallow Marvels. Assorted colors.....	50	4 00	
<i>Hydrastis canadensis</i> . Golden Seal....	15	1 00	8 00
<i>Iris germanica</i> . Mixed varieties.....	20	1 50	12 00
<i>kaempferi</i> .....	20	1 50	12 00
<i>pseudacorus</i> .....	20	1 50	12 00
<i>pumila</i> .....	20	1 50	
<i>sibirica</i> . Snow Queen.....	20	1 50	12 00
<i>verna</i> .....	20	1 50	12 00
<i>versicolor</i> . Blue Flag.....	15	1 00	8 00

## Hardy Native Ferns

Sizes following Ferns indicate the size the plant may be expected to attain under cultivation.

<i>Adiantum pedatum</i> . Maidenhair Fern.....	Per 10	100	1,000
8 to 20 in.....	\$1 00	\$8 50	\$75 00
<i>Aspidium (Dryopteris) acrostichoides</i> . Dagger Fern. 8 to 20 in.....	75	0 00	50 00
<i>braunii</i> . 10 to 36 in.....	1 50	12 50	
<i>cristatum</i> . 1 to 2 ft.....	75	0 00	
<i>cristatum elintonianum</i> . 16 to 52 in.....	1 00	8 50	
<i>filix-mas</i> . 12 to 44 in.....	1 50	12 50	
<i>goldianum</i> . Goldie's Fern. 24 to 40 in.....	1 50	12 50	
<i>marginalis</i> . Shield Fern. 12 to 28 in.....	75	0 00	50 00
<i>munitum</i> . Chamisso's Shield Fern.....	2 00	17 50	
<i>noveboracensis</i> . New York Fern.....	75	0 00	
<i>spinulosa</i> . Spinulose Shield Fern.....	1 00	8 00	
<i>spinulosa dilatatum</i> . Broad fronds.....	1 50	12 50	
<i>thelypteris</i> . Marsh Shield Fern.....	1 00	8 00	
<i>Asplenium angustifolium</i> . 3 to 4 in.....	1 25	10 00	
<i>ebeneum</i> . 9 to 18 in.....	1 00	8 00	
<i>filix-femina</i> . Lady Fern. 10 to 40 in.....	1 00	8 00	
<i>thelypteroides</i> . Silvery Spleenwort. 2 to 3 ft... 1 00	1 00	8 00	
<i>trichomanes</i> . Maidenhair Spleenwort. 3 to 8 in. 1 00	1 00	8 00	
<i>Botrychium ternatum dissectum</i> .....	1 00	8 00	
<i>obliquum</i> . 4 to 16 in.....	1 00	8 00	
<i>virginianum</i> . Virginia Grape Fern. 1 to 2 ft... 1 00	1 00	8 00	
<i>Camptosorus rhizophyllus</i> . Walking Fern.....			
4 to 12 in.....	1 25	10 00	
<i>Chellanthus fendleri</i> . Lip Fern.....	4 00		
<i>Cystopteris bulbifera</i> . Bladder Fern. 1 to 2 ft... 75	75	0 00	
<i>fragilis</i> . Brittle Fern. 4 to 12 in.....	1 00	8 00	
<i>Diocksonia punctilobula</i> . Hly-scented Fern.			
20 to 40 in.....	1 00	8 00	00 00
<i>Lygodium palmatum</i> . Climbing Fern. 1 to 3 ft... 1 50	1 50	12 50	
<i>Onoclea sensibilis</i> . Sensitive Fern. 4 to 12 in.... 1 00	1 00	8 00	00 00
<i>struthiopteris</i> . 2 to 10 ft.....	1 00	8 00	
<i>Ophioglossum vulgatum</i> . 2 to 42 in.....	1 00	8 00	
<i>Osmunda cinnamomea</i> . Cinnamon Fern.			
32 to 63 in.....	1 50	12 00	100 00
<i>claytoniana</i> . Clayton's Fern. 2 to 4 ft.....	1 50	12 00	100 00
<i>graellsii</i> . 2 to 6 in.....	1 00	8 00	
<i>regalis</i> . Royal Fern. 12 to 63 in.....	1 50	12 00	
<i>Pellaea atropurpurea</i> . Purple-stemmed Cliff Brake			
4 to 24 in.....	1 50	12 00	
<i>densa</i> .....	1 00	8 00	
<i>graellsii</i> . Slender Cliff Brake. 2 to 6 in.....	1 50	12 00	
<i>Phegopteris dryopteris</i> . Oak Fern. 6 to 10 in... 1 00	1 00	8 00	
<i>hexagonoptera</i> . Broad Beech Fern. 7 to 12 in. 1 00	1 00	8 00	
<i>polypodioides</i> . 4 to 8 in.....	1 00	8 00	
<i>Polypodium falcatum</i> . 0 to 15 in.....	1 25	10 00	
<i>vulgare</i> . Polypody. 3 to 6 in.....	75	0 00	45 00
<i>Pteris aquilina</i> . Common Brake. 4 to 36 in..... 75	75	5 00	30 00
<i>Scolopendrium vulgare</i> .....	3 00	20 00	
<i>Woodsia ilvensis</i> . Rusty Woodsia.....	1 00	8 00	
<i>obtusata</i> . Blunt-lobed Woodsia. 8 to 20 in..... 1 00	1 00	8 00	
<i>Woodwardia angustifolia</i> .....	1 50	12 50	
<i>virginica</i> . Virginia Chain Fern. 24 to 64 in.... 1 00	1 00	8 00

## "COLLECTED" CLUMPS

---

## BY THE CARLOAD

---

For the area covered and effect produced, a carload of Rhododendrons or Kalmias, offered below, is the cheapest landscape proposition offered. I ship an unusual grade of splendid clumps, each plant a specimen and burlaped separately. Don't accept cheap stock, thrown into cars without burlaping, and with the fine, hair-like rootlets inevitably exposed. You will be disappointed and find it expensive in the end. While fine results may be had from "collected" Rhododendrons, particularly if purchased from a reliable source, where greatest care is used in digging and handling, results are never so sure as when nursery-grown stock is used. "Collected" Rhododendrons and Kalmias delivered at your station by the carload. To be shipped from point determined by me.

### Rhododendron catawbiense "Collected" Clumps

Each plant collected from the open and burlaped. Prices, delivered f. o. b. your station, if east of the Mississippi river.

Car containing 200 clumps, 1 to 3½ ft., for.....	\$280 00
Car containing 300 clumps, 1 to 3½ ft., for.....	380 00
Car containing 400 clumps, 1 to 3½ ft., for.....	480 00
Car containing 600 clumps, 1 to 3½ ft., for.....	600 00
Other combinations and sizes quoted on request.	

### Rhododendron maximum "Collected" Clumps

Prices in carload lots, delivered f. o. b. your station, if east of the Mississippi River, collected from open ground, and each specimen burlaped separately.

Car containing 300 clumps, 1½ to 4 ft., for.....	\$300 00
Car containing 400 clumps, 1½ to 4 ft., for.....	375 00
Car containing 600 clumps, 1½ to 4 ft., for.....	500 00

Other sizes or combinations will be made up to suit customers. It is far cheaper to buy my kind at slightly increased price, and have plants that will grow.

### Rhododendron maximum and R. catawbiense

#### "Collected" Clumps by the Carload

Mixed cars, delivered free at any station east of the Mississippi River. Car containing 150 maximum and 150 catawbiense, collected as above, 1½ to 4 ft., clumps,—total of 300—for \$400. Car containing 250 maximum and 250 catawbiense, 1½ to 4 ft., clumps,—total of 500—for \$550.

### Kalmia latifolia (Mountain Laurel)

#### "Collected" Clumps by the Carload

Each specimen burlaped, and highest-class clumps collected from the open, delivered free at your station, if east of the Mississippi River.

Car containing 400 clumps, 1 to 3½ ft. for \$375. Kalmia may be added to help fill any Rhododendron car at 90 cts. per clump, not less than 100 clumps in shipment.

The above "Carload" offers are made with a view of furnishing a variety of sizes that will permit of naturalistic grouping.

"Collected" Rhododendrons and Kalmia by the 100 and 1,000. The number that may be shipped in a car varies largely, depending on sizes. The minimum weight allowed to the car is 10,000 lbs., with a freight rate to New York of \$96.

A car may easily be loaded much heavier, with proportionate increased freight charge, but not increasing the cost per plant.

A full car travels safer than one with a small load.

All "Clumps" offered below are collected with a good ball and are burlaped separately.

#### Prices of "Collected" Clumps of Rhododendrons and Kalmias

Rhododendron catawbiense.—	Each	10	100	1,000
1 to 2 ft., "collected" clumps....	\$1 50	\$10 00	\$80 00	\$700 00
